Dear burmese comrades,

We're deeply moved by the events happening in your country.
We know the syndicalist action in Burma's completely locked and endangers the very life of those who get involved in it.

Being representatives of an associative and syndical organization that brings together about 3000 french speaking swiss teachers, our task is to make sure our colleagues are free to meet to securely discuss their working conditions - wether it be here or anywhere in the world.
As trade union activists and supporters of education development, we lend our total support to you on this World Teacher's Day.

Insofar as we may, we're willing to act. Above all, we're ready to transmit any information that you may find useful.

Sincerely, and closely, yours
